HEALTH AT HOME ADVANTAGES

Home Care Benefits:

Our services can help prevent rehospitalization, postpone institutionalization, and reduce the need for urgent care.

We offer convenience. Visits are made on your schedule, in the comfort and privacy of your home.

We offer one-on-one care personalized to your unique needs.

Home Health Benefits:

Care at home costs less than hospital or facility care. Medicare pays 100% for qualified patients.

Home health care reduces stress for patients and caregivers, while allowing patients to heal at home with their families and loved ones.

Home health care promotes better outcomes. Studies show that many patients achieve better outcomes at home.

Physical Therapists

Occupational Therapists

Speech Therapists

Medical Social Workers

QUALIFYING FOR HOME HEALTH

To qualify for home health services, you must have a medical need for the skilled services of a nurse or therapist. You must meet Medicare's definition of homebound. This only means that leaving the home requires taxing effort and that you therefore leave the home infrequently. You can be temporarily homebound due to illness or injury. **Primary Medical HomeCare** must also receive orders from your doctor to provide home health services. Upon request from you or referral from your doctor, **Primary Medical HomeCare** will coordinate with your doctor directly. We can provide home care health services in assisted living facilities as well as in private residences.

If you or someone you know may benefit from nursing or medical therapy in the comfort of home, please call Primary Medical HomeCare now:
